a provocative call for architects to remember and embrace the nonhuman lives that share our spaces a spider spinning its web in a dark corner wasps building a nest under a roof there s hardly any part of the built environment that can t be inhabited by nonhumans and yet we are extremely selective about which animals we keep in or out this book imagines new ways of thinking about architecture and the more than human and asks how we might design with animals and the other lives that share our spaces in mind animal architecture is a provocative exploration of how to think about building in a world where humans and other animals are already entangled whether we acknowledge it or not

the tyranny of architecture is a full philosophical defense of veganism one that defends the practice in a way fundamentally unique among such arguments it makes the case that in a human society built on artificial constructs the only demonstrable ethics not part of an imagined community is that of respecting the right to life and contentment construed for farmed animals as adequate food space and other basic amenities along with the right not to be tortured and killed for the unnecessary whims of humans existing mentally within a subset of artificial constructs that do not include those nonhuman animals
