we think we are the lucky country but what we really have is dumb luck too much luck more than we know what to do with paul cleary in too much luck paul cleary shows how the resource boom which seems a blessing could well become a curse we have never seen a boom quite like this one under taxed and under regulated multinational companies are making colossal profits by selling off non renewable resources new projects are being rushed through weekly but who is looking out for the public interest as the boom accelerates it will drive the dollar higher and higher and force up the cost of doing business for everyone else industries that involve many jobs such as tourism and education will fade away what happens if commodity prices suddenly collapse as they have in the past or worse when the resources run out many countries before us have been caught by the resource trap a heady period of boom and growth followed by a painful bust paul cleary maps out the pitfalls counts the human and environmental costs shows what has worked overseas and suggests a better way forward one which would turn this one off windfall into a lasting legacy

the perception of most australians is that the mining boom delivered unambiguous benefits for the australian economy including more jobs exports tax revenues and for the majority of people higher incomes but was this the case this paper looks more closely at the extent to which australians have in fact benefitted from the boom which it dates as beginning after the december quarter 2004 when commodity prices clearly began to show the impact of the increased demand from the rest of the world developments after 2004 are taken to reflect the effects of the mining boom page 2

this is an economic history of sixteenth century europe that combines the virtues of a scholarly monograph with those of a general history professor miskimin describes the intellectual and philosophical context in which economic decisions were made and on which the fundamental economic categories of the period were based

until september 1969 poseidon was a name known only to a handful of investors then in the space of four months the stock rocketed from 80 cents to 280 a share and pushed the speculative share market sky high all of a sudden thousands of ordinary australians who had never seen a mine or even a stock exchange were gambling in the wildest stock market boom the nation has ever seen millions of dollars were won and lost in a matter of hours sadly just about everyone lost in the end so what happened and why in the money miners trevor sykes writes of how and why mining shares rose and fell so dramatically and traces
